

SMART Lighting Control

Volkswagen – Case Study

With investment from European Regional Development

Fund European Commission – Investing in your future

- Guaranteed Savings of Energy and Your Money
- The Easiest Way

We Put Brakes on Your Power Meter

„One of our goals is to reduce energy consumption. The SEAK company has shown us potential by increasing efficiency with the help of public lighting management in a wide range of options as well as individual settings for standalone lighting circuits with regard to our needs. Using this system, its variability at a minimum cost of maintenance has proved to be the right decision.“

Ing. Štefan Hanečák, Building Management / Factory Planning
