

SEAK

RGB Lighting Control

for floodlights, tunable white
and festive lights

For more information, contact us
at sales@seakergetics.com

● Main features

- Setting up individual lighting scenes for your building
- In each scene you can adjust different features: color, intensity or color temperature
- Define timing schedule for the color scenes

● What do you need?

- One LUMiNODE module, which allows you to control a DALI DT8 driver
- No additional cable - sending of commands takes place via existing power line
- Control unit LUMiCHARGER and LUMiBOX modulator in electrical cabinet, which enables autonomous, local and remote management of lighting
